Laboratory Activity #01 - Part 2
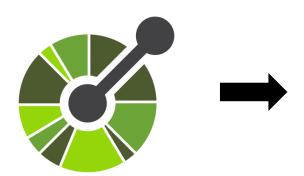

Distributed Systems Programming

Daniele Bringhenti
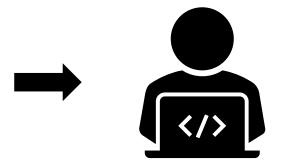

Design and implementation of REST APIs

Work **step by step**: first the design, then the implementation!

Next lab session

What do you need for the **next** lab session?

- The next laboratory session will be about **gRPC**.

- You will be asked to extend the **Film Manager** service with the functionality to interact with a gRPC server.

- **Tip**: use this lab session to ask any question about the **first** lab activity, as the next ones will be based on it.

Thanks for your attention!
